Professional Experience

Software Engineer, Base

Dec 2024–Present

- Implemented Github CI/CD pipelines to streamline development and deployment processes
- Managed a small group of international developers across multiple time zones
- Performed significant refactors to modularise code, enabling easy switching between monolithic and services-based architecture
- Migrated from Node PayPal SDK v0.8 to 1.1.0, improving payment processing reliability
- *Technologies: PostgreSQL, Node.js, React Native*

DevOps Engineer, Cyberloop (Oil tech)

Jan 2023–Feb 2024

- Implemented CI/CD pipelines in bitbucket that reduced manual testing time by 75%
- Refactored Cypress tests and wrote majority of tests for multiple complex SaaS products
- Reduced migration costs by 20% by creating bash script to compress unstructured data on Firebase
- Developed GenAI-powered tool that assigns labels for difficulty and time automatically
- Maintained and deployed Docker containers using Portainer and Helm on Google Cloud Engine

Python Tutor, Junior Engineers

Jun 2021– Present

- Rewrote programming classes for children and teens, making complex coding concepts easier to understand
- Led advanced classes for 8-16 year olds, teaching Python OOP, Scratch, Arduino, Minitendo

Teacher Assistant - Cert IV in Cybersecurity, NDIS (TAFE)

Nov 2021–May 2022

- Taught foundational Python programming and networking concepts
- Provided hands-on training in network infrastructure, covering switches, routers, and server technologies

Education

University of Queensland – Bachelors of Computer Science/Commerce

2021–Present

Projects - All projects available on [GitHub](#)

AgriMarket Live: *platform for buying and selling produce with real-time market features* [\[GitHub\]](#)

- Deployed Go-based microservices on AWS ECS with containerized Docker architecture
- Created React Vite frontend with backend integration
- Managed infrastructure with Terraform, utilizing AWS Cognito for authentication and S3 for file storage
- *Technologies: Go, React, Docker, AWS ECS, Cognito, S3, Terraform*

Gleam DynamoDB Client: *first gleam DynamoDB client* [\[GitHub\]](#)

- Implemented and interfaced with the low-level AWS API integrations and documentation
- Designed type-safe query builders leveraging Gleam's functional programming paradigms
- Integrated AWS signature authentication and secure communication protocols
- *Technologies: Gleam, AWS DynamoDB, AWS SDK, Functional Programming*

Distance Measurement Computer Vision: *computer vision system to measure distances in real-time* [\[GitHub\]](#)

- Implemented color detection and object tracking with live calibration functionality
- Created a Tkinter GUI for real-time measurement display and system controls
- *Technologies: Python, OpenCV, NumPy, Tkinter*

Collaborative Drawing WebApp: *real-time collaborative drawing application* [\[GitHub\]](#)

- Developed custom HTML canvas drawing system
- Built Go microservices with goroutines and WebSocket connections for real-time collaboration
- Deployed on AWS using containerized architecture with Kubernetes orchestration
- *Technologies: Go, JavaScript, Docker, Kubernetes, AWS, WebSockets*

Reddit Clone: *social media client with improved scroll-style UI* [\[GitHub\]](#)

- Created interactive social media platform with enhanced user experience
- *Technologies: Reddit-API, Quasar, Vue.js, javascript*

Open-Source Contributions

goproxy [\[GitHub\]](#)

- Developed HTTP Archive (HAR) middleware with Prometheus/Grafana integration using goroutines
- Modernizing project's testing infrastructure, transitioning to modern testing practices using testify

Technologies and Skills

Languages: Go, Java, Python, TypeScript, Bash, SQL, Gleam, C, C++

Web Technologies: React, Vue.js, ASP.NET, HTML, CSS

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, Nix, GCP

Databases: PostgreSQL, SQLite, Redis, Cassandra, DynamoDB, Valkey

Tools: Git, GitHub, Playwright, CI/CD, Kafka, Atlassian

Operating Systems: Windows, Mac, Linux, Arch-Linux, NixOS, Ubuntu
